## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-7 and 9-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims 4-7 and 9-11 have not been further treated on the merits.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term FOREX\_EPC E 50.650 is not understood. The applicant is also reminded that abbreviations cannot be used in the claims.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grajek in view of Lipp.

Grajek discloses the use of a soundboard for a musical instrument made of wood.

Grajek does not disclose the use of a soundboard.

Lipp discloses the use of a musical instrument made of wood and polycarbonate.

Lipp also discloses that the use of foam structure is well known and used in the art (column 1, line 59).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the wood soundboard for a musical with the polycarbonate wooden device as taught by Lipp in order to provide an acoustic device with sustained durability.

6. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956**.
